

Mithun Raj M R

Bengaluru, Karnataka, India | +91-6364242307 | mithun.mr@wipro.com

Portfolio: mithunrajmr.netlify.app | GitHub: github.com/mithunrajmr | LinkedIn: linkedin.com/in/mithunrajmr

PROFESSIONAL SUMMARY

Software Developer experienced in building full-stack web applications, enterprise software, and AI-enabled solutions. Skilled in Java, Spring Boot, React, and SQL, with experience across product development, enterprise engineering, and applying modern AI technologies to build and enhance software solutions.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS, SQL

Frameworks & Technologies: Spring Boot, React, FastAPI, Flask, Hibernate, WebSockets

AI, Agents & Cloud: Google Cloud (Vertex AI, Cloud Run), Google Gemini, Google ADK, MCP, RAG, Multi-Agent Architectures, IBM watsonx

Databases: MySQL, PostgreSQL, Redis, Firebase Firestore, Oracle SQL, Google BigQuery

Tools: Git, GitHub, Maven, Vite, Postman

PROFESSIONAL EXPERIENCE

Wipro Limited

Bengaluru, India

Project Engineer

Mar 2026 – Present

- Contributing to an enterprise application for Qatar Airways, working across application development, enhancement, and modernization as part of a full-stack engineering team.
- Using AI-assisted development approaches to accelerate the upgrade of existing application functionality while adapting business logic and workflows to the modernized application.

Au Multidimensional Solutions Pvt. Ltd.

Bengaluru, India

Product Engineer

Nov 2024 – Mar 2026

- Owned end-to-end delivery of digital products and client solutions, from requirement gathering and planning through development, creative execution, feedback, quality review, and final delivery.
- Led and coordinated a 10+ member team across multiple client projects, managing task allocation, progress, feedback cycles, and delivery while working closely with project stakeholders.
- Delivered digital experiences across web development, UI/UX, branding, website content, SEO, social media creatives, presentations, pitch decks, and other client-facing digital assets.
- Developed web solutions using React, JavaScript, HTML, CSS, and MySQL, while also applying AI-assisted image/video generation and content workflows to accelerate creative production.

PROJECTS

DoConnect AI – Full-Stack Discussion & Collaboration Platform

Spring Boot, React, MySQL, JWT, WebSocket

(github.com/mithunrajmr/DoConnect-AI)

- Developed a full-stack discussion platform using Spring Boot, React, MySQL, and JWT Authentication.
- Implemented question-answer workflows, role-based access control, and REST APIs for users, moderators, and administrators.
- Built a real-time chat module using a separate chat microservice architecture and WebSocket communication.
- Integrated Google Gemini-powered features including answer assistance, discussion summarization, smart tag prediction, and question recommendations.
- Developed moderation and analytics dashboards to support platform management and content oversight.

TORII – Enterprise Autonomous Branch Operations Platform

PostgreSQL, Redis, IBM watsonx Orchestrate,

Google Gemini (github.com/mithunrajmr/torii/)

- Developed an enterprise branch operations platform that uses AI agents to triage customer requests, automate document verification, and streamline teller workflows before in-person service.
- Built a multi-agent workflow using IBM watsonx Orchestrate and Google Gemini for document analysis, compliance checks, fraud detection, and customer assistance, with parallel agent execution reducing processing time to under 1.8 seconds.
- Implemented secure QR-based mobile continuation, OTP authentication, RBAC, and HITL teller workflows supporting 7 banking services.
- Selected as a **Finalist** in the HackOn Agentic AI with IBM Bob & watsonx 2026 hackathon.

DecisionIQ – AI Decision Intelligence Platform

React, FastAPI, Google BigQuery, Vertex AI Gemini, Docker

(github.com/mithunrajmr/DecisionIQ)

- Developed an AI-assisted decision support platform to help grocery store owners compare inventory purchasing strategies using live operational data.
- Built REST APIs with FastAPI to manage inventory, generate AI-powered purchasing scenarios, and provide explainable recommendations.
- Integrated Google BigQuery for inventory management and Vertex AI Gemini to generate context-aware purchasing insights based on inventory, weather, and business priorities.
- Designed an interactive dashboard with inventory analytics, scenario comparison, and decision history to support transparent and informed decision-making.

MR Flow – Workflow Management Application (mr-flow.netlify.app)

React, Firebase

- Designed and developed a workflow and productivity management application using React and Firebase.
- Implemented task tracking, time logging, reporting workflows, and visual productivity dashboards.
- Integrated secure authentication, user-level data isolation, and cloud storage using Firebase services

EDUCATION

Don Bosco Institute of Technology

Bengaluru, India

Bachelor of Engineering in Information Science Engineering; CGPA: 8.6

2021 – 2025

ACHIEVEMENTS

- **Finalist – HackOn Agentic AI with IBM Bob & watsonx (2026)** – Developed **TORII**, an enterprise AI platform for autonomous branch operations.
- **Google Gen AI Academy APAC Hackathon (2026)** – Developed **DecisionIQ**, an AI-powered inventory decision platform using Google Cloud Vertex AI and BigQuery.

CERTIFICATIONS

- **Google Cloud Certified Partner Specialist** – Gemini Enterprise Agent Development (2026)
- **Google Cloud Certified Partner Specialist** – Gemini Enterprise Deployment (2026)
- **Google Cloud Gen AI Academy APAC 2026** – Cohort 1, 2 & 3
- **NPTEL:** Programming in Java (2023), The Joy of Computing Using Python (2023), Social Networks (2024)
- **Udemy:** 100 Days of Code – The Complete Python Pro Bootcamp (2024)
- **Rapsol Technologies:** Fundamentals of Machine Learning (2024)
